## FEATURED STORY

### Sharp AutoGas Fueling Station Opens in North Carolina

Sharp Energy opened its first autogas fueling station in North Carolina. Located at 17220 U.S. Route 421 in Dunn, North Carolina, and is the newest one of 60 propane fueling stations operated by Sharp AutoGas.

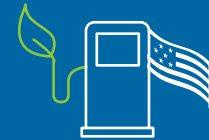

Other stations are in Pennsylvania, Delaware, Maryland, Virginia and Florida. "We are excited to expand our propane autogas offerings to North Carolina. This new fueling station will provide a lower emissions fuel option for truck fleets and other vehicles that operate in the area," said Andrew Hesson, vice president of propane operations.

The ribbon-cutting event included representatives from the North Carolina Energy Policy Council, Dunn Chamber of Commerce and the North Carolina Technical Education Center, among others. As part of the Company's mission, Chesapeake Utilities strives to make life better for the people and communities where its employees live, work and serve. During the grand opening event, Chesapeake Utilities announced a \$5,000 donation to the Beacon Rescue Mission in Dunn, North Carolina. The organization provides food, shelter and clothing to the homeless in Harnett County.

### Alternative Fuel Tax Credit

The Alternative Fuel Tax Credit was approved in August for the entire year of 2022 through December 31, 2024.

What does this mean for autogas users? Autogas users are eligible for a credit of 37 cents per gallon of propane. Months prior to the credit being approved will be retroactive to those who file for it. This is a great incentive for using a cleaner burning alternative fuel. Sharp Energy will be sending out paperwork to current autogas customers by the end of 2022 explaining how to claim this credit.

**Do you have new employees or need a refresher course on how to use your propane fueling station?** To schedule a time, call your local Sharp office or point of contact.

Displayed in the chart below is a comparison of propane autogas prices versus gasoline prices. **Autogas customers can see significant savings.**

PROPANE VS. GASOLINE PRICES			
Market	Propane Prices	Gasoline Prices	Price Difference
Delaware	\$2.10	\$3.66	\$1.56
Florida	\$1.85	\$3.38	\$1.53
Maryland	\$2.20	\$3.73	\$1.53
Pennsylvania	\$2.35	\$3.95	\$1.60

\*Prices as of 10/17/2022 \*Average gasoline prices found on gasbuddy.com

**Sharp AutoGas opened a new private autogas station** at the Lewes Transit Center, Park and Ride. The station is located at 347 Coastal Hwy., Lewes, DE.

## Thank You

As all our customers are valued and appreciated, Sharp AutoGas needs to recognize and give a special thanks as this person and company paved the way for propane autogas school buses for Sharp AutoGas and for the State of Maryland. Randy Jubb, owner and CEO of Jubb's Bus Service decided to roll out a propane autogas school bus in 2015. This was the first propane autogas school bus in the State of Maryland and since that time other school bus contractors decided to go the same route. Since 2015, Randy has added over 30 propane autogas school buses to his fleet and looks to add more down the road. In fact, Randy has deployed a second propane autogas fueling station at another location for his propane autogas operation. It's customers like Randy that pave the way for others and lead by example. Sharp Energy is proud to be Jubb's Bus Service propane autogas provider and happy that they are a supporter of alternative fuels.
